

Macula System

System

Macula is a remote-controlled followspot system, with unprecedented performance thanks to its incredibly high-resolution fluid head and simple yet powerful software control. The Macula system is not tied to any brand of lighting fixture, offering wide compatibility with intelligent moving heads from a number of manufacturers, including the Martin MAC Ultra Performance, Ultra Wash & ERA 600, Jb-lighting P18 & M18. Robe, Ayrton, Cameo, Clay Paky, High End Systems and more. H...
